

Delta Covert Radio

Carrying Solutions

SONIC
COMMUNICATIONS

The *Delta* range of covert radio carrying garments provide innovative and integrated solutions to bodyworn radio carriage. Modern design techniques, combined with the use of advanced materials, ensures that the *Delta* range of garments resolve many of the common problems associated with conventional radio harness design.

Manufactured in both **Tactel**® and Air Flex (*Delta3+*), the fabric and garment design provide the following qualities, which together, make this award winning product a major step forward for the professional surveillance operative.

Designed by a leading UK based design company, the *Delta* range of garments provides solutions for all makes and models of radio, combined the compatibility with existing inductive loop systems, microphones, antennas, transmit switches and handheld remote control units.

In addition to upper body carriage of radios, the *Delta* range includes solutions for carriage of the radio below waist level, on either the left or right hand side thigh, underneath trousers, skirts or even shorts, which has previously not been possible with leg or ankle radio carriage solutions.

Using the same **Tactel**® fabric as used on the vests, the thigh harness ensures the radio is held securely to the leg, to prevent movement during walking or running, yet due to the carefully controlled elasticity of the garment, no restriction in movement or discomfort to the wearer is experienced. With many hours of operational deployment carried out both during and post design, the *Delta* range of covert radio carrying solutions ensures that surveillance operatives have the latest products available to assist in their operational duties.

Delta3+

Delta Micro

Delta3

Thigh Harness

The *Delta Micro* provides a fresh alternative to the traditional covert surveillance shoulder harness.

Lightweight and comfortable to wear the vest comes in a large number of sizes so will therefore, comfortably fit most people. Available to fit most TETRA, TETRAPOL and analogue radios there will be a Delta carrying solution available for all scenarios.
