

Environmental Objectives

A,

Objective: To reduce the amount of gas and electricity that is used.

How: By encouraging good practice to turn off any unused items, replace current light sources to new low energy units and install solar panels to the roof space.

When: Continually review energy consumption at the management review meetings and continue to replace light units with new low energy LED units.

B,

Objective: To ensure our waste is disposed of in an environmentally compliant way, with a drive to maximise the amount that is recycled.

How: By using waste management schemes and licensed waste disposal companies.

When: Continual monitoring and reporting of waste disposal methods to ensure legal and environmental compliance.

C,

Objective: To reduce the amount of paper used compared to the previous year.

How: By using electronic viewing, processing, and storage of documents to reduce the need for printing and when printing is necessary use double sided prints.

When: Results for paper used year on year to be reviewed at the each management review meeting.

D,

Objective: To reduce the number of plastic bags used for packaging compared to the previous year.

How: By using fabric pouches and cardboard boxes where possible.

When: Results for plastic bags used year on year to be reviewed at the next management review meeting.

E,

Objective: To further develop our environmental management system to maintain certification to ISO14001:2015.

How: Through regular internal audits, external audits by BSI and annual management review.

When: Continual annual review, next due March 2024.
