

Carbon Reduction Plan

Supplier name: Sonic Communications (Int) Ltd

Publication date: 16/02/2026

Commitment to achieving Net Zero

Sonic Communications (Int) Ltd is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2021																
Additional Details relating to the Baseline Emissions calculations.																
Base line reporting for 2021 as this is the first year of calculations for carbon emissions. Please note that calculations for carbon emissions may be lower than expected due to a reduction in travel and travel restrictions because of the worldwide pandemic (Covid-19).																
Baseline year emissions:																
EMISSIONS	TOTAL (tCO₂e)															
Scope 1	68.277															
Scope 2	60.448															
Scope 3 (Included Sources)	111.267 Our Scope 3 emissions breakdown is as follows: <table border="1" data-bbox="475 1653 1273 1917"> <tr> <td>4</td> <td>Upstream transportation and distribution</td> <td>6.146</td> </tr> <tr> <td>5</td> <td>Waste generated in operations</td> <td>0.422</td> </tr> <tr> <td>6</td> <td>Business travel</td> <td>15.087</td> </tr> <tr> <td>7</td> <td>Employee commuting</td> <td>80.471</td> </tr> <tr> <td>9</td> <td>Downstream transportation and distribution</td> <td>9.140</td> </tr> </table>	4	Upstream transportation and distribution	6.146	5	Waste generated in operations	0.422	6	Business travel	15.087	7	Employee commuting	80.471	9	Downstream transportation and distribution	9.140
4	Upstream transportation and distribution	6.146														
5	Waste generated in operations	0.422														
6	Business travel	15.087														
7	Employee commuting	80.471														
9	Downstream transportation and distribution	9.140														
Total Emissions	239.992															

Current Emissions Reporting

Reporting Year: 2025			
EMISSIONS	TOTAL (tCO ₂ e)		
Scope 1	44.756		
Scope 2	37.357		
Scope 3 (Included Sources)	111.735		
	4	Upstream transportation and distribution	12.963
	5	Waste generated in operations	0.072
	6	Business travel	23.192
	7	Employee commuting	58.027
	9	Downstream transportation and distribution	17.481
Total Emissions	193.848		

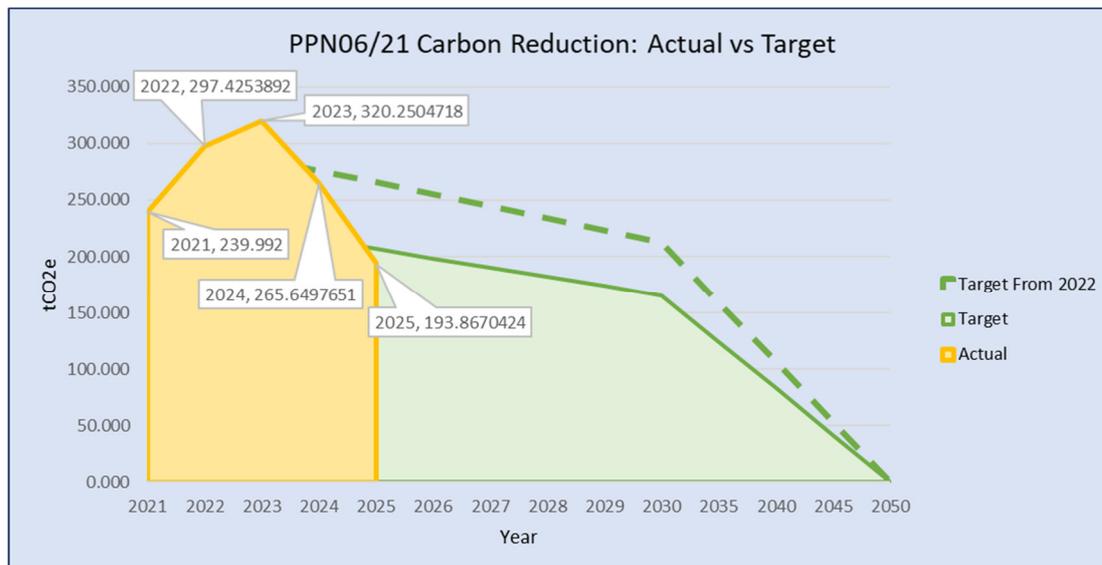

Emissions reduction targets

2025 saw a decrease in emissions for scope 1, 2 and 3 bringing the total emissions below the target set from our base line year.

To achieve Net Zero, we have adopted the following carbon reduction target.

We project that our carbon emissions will decrease over the next year to 185tCO₂e. This will maintain our target to net zero from our baseline year and would be a reduction of 5% from our current level.

Progression towards our net zero target can be seen illustrated in the graph below:

Carbon Reduction Projects

Carbon Reduction Initiatives

The following environmental management measures and projects have been implemented since the 2021 baseline:

- Charging points, within the company car park, are provided to help support employees who commute to work using electric or plug in hybrid vehicles.
- Replacement efficient air-cooling systems have replaced older units in our main production facilities
- Building Management System has been implemented to manage the heating and cooling levels of the building to make it more efficient and comfortable to work in.
- Replacement Boilers for the Dual systems within the building using less Gas.
- Replacement water heaters for the hand-washing systems

Initiatives for 2026

There are no new initiatives for 2026 just a continuation of the following:

- Continued certification to ISO14001 which will help support our drive to reduce emissions.
- Employees with company vehicles are offered a wide range of hybrid, plug in hybrid and fully electric vehicles to encourage better environmental options when vehicles are renewed.
- Regular bulletins to employees advising and encouraging environmental initiatives and requirements.
- Regular servicing of all air-conditioning units to reduce the potential release of refrigerant gasses into the atmosphere.
- Solar panels, to the roof of the building, were installed in May 2023 and continue to provide approximately 29% of our electricity supply.

In the future we hope to implement further measures such as:

- A carbon offset scheme.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

.....

.....Marcus Twomlow – Sales Director.
